DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-4, drawn to a silicon substrate, classified in class 428, subclass 620.
 - II. Claims 5-6, drawn to a method, classified in class 216, subclass 58.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, etching with an alkaline aqueous solution or dry etching are used to form structures on a wide variety of other materials other than silicon.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Moreover, because the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Lawrence McClure on Sept. 27, 2005, to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1765

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
